PATENT COOPERATION TREATY

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/EP2004/050506

Re Item V.

1) The following document is referred to in this communication:

D1: WO 92/10270 A (PACQUES BV) 25 June 1992 (1992-06-25)

- 2) Document D1, which is considered to represent the most relevant state of the art, discloses (see claim 1) a process for the removal of sulphur compounds from a gaseous effluent, comprising the steps of a) contacting the gas stream with a aqueous alkaline washing liquid to obtain a sulphur compounds depleted stream and a sulphide-comprising aqueous stream; b) contacting the aqueous stream with sulphide oxidizing bacteria in the presence of oxygen in an oxidation reactor to obtain a sulphur slurry and a regenerated aqueous alkaline washing liquid; c) separating elemental sulphur from the aqueous solution and d) recycling the regenerated aqueous to step a).
- 3) From this, the subject-matter of independent claim 1 differs in that, the H2S depleted gas stream is contacted in a mercaptan removal zone with a second aqueous alkaline washing liquid, which avoids the high comsumption of alkaline washing liquid that would be required to remove both the H2S and mercaptans in a single step.
- 4) The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)
- 5) The problem to be solved by the present invention may be regarded as, how to simultaneous remove H2S and mercaptans without an excessive consumption of alkaline washing liquid.
- 6)The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) because it is neither shown or suggested by the prior art cited in the search report.
- 7) Claims 2-8 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
- 8) The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claim 9, which therefore is also considered new and inventive.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2004/050506

9) Claim 10 is dependent on claim 9 and as such also meets the requirements of the PCT with respect to novelty and inventive step.
